

Dashboards of Index of Economic Freedom

This project analyses global economic freedom using 12 metrics grouped under four pillars: Rule of Law, Government Size, Regulatory Efficiency, and Open Markets. Data from the 2022 Index of Economic Freedom highlights how each country enables or restricts individual choice, investment, and enterprise. Through interactive dashboards—featuring maps, waterfall charts, funnels, and comparative plots—we explore key insights on governance, policy impact, and openness to trade.

Dashboard 1:

Dashboard 1 explores the Rule of Law, focusing on Property Rights, Judicial Effectiveness, and Government Integrity across countries. It uses interactive maps and comparative charts to reveal legal strength, transparency, and institutional quality by region.

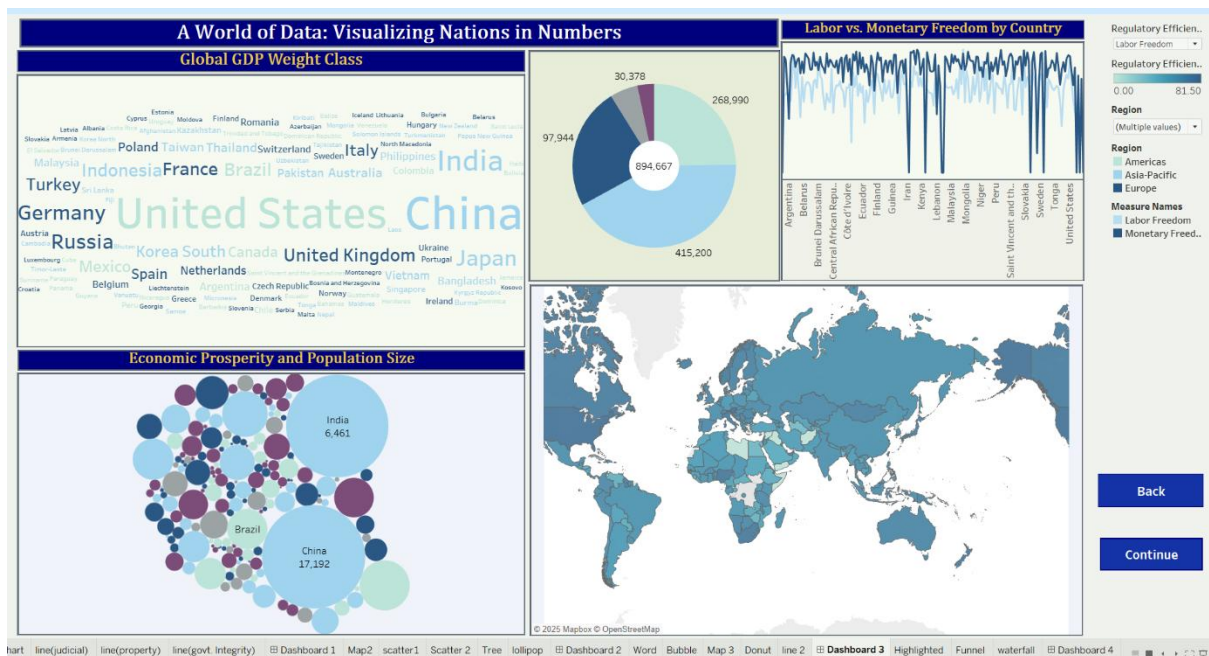

Dashboard 2:

This dashboard examines Tax Burden, Government Spending, and Fiscal Health, highlighting how the size and efficiency of governments impact economic freedom. Scatter charts and tree comparisons reveal the relation between taxation, expenditure, and fiscal sustainability across nations.

Dashboard 3:

Focusing on Business Freedom, Labor Freedom, and Monetary Freedom, this dashboard illustrates how efficiently regulations support entrepreneurship, labour markets, and price stability. Charts uncover variations in regulatory environments and their effect on overall economic agility.

This dashboard visualizes Trade, Investment, and Financial Freedom, measuring how open economies are to global commerce and capital flow. Waterfall, funnel, and highlighted charts showcase openness levels and their correlation with economic growth.
